DESCRIPTORS College Faculty; College Students; Educational Facilities; Educational Finance; Higher Education; *Institutional Characteristics; Institutional Mission; Research Projects; Research Universities; *State Universities; Student Characteristics; Teacher Characteristics
IDENTIFIERS *University of Alaska Fairbanks

ABSTRACT

This publication presents information on the University of Alaska Fairbanks in seven sections. The first section, "Historical and General Information" details the legal establishment, mission, historical highlights, map, organizational structure, accreditation, Board of Regents, Standing Committees and advisory groups, songs, presidents and chancellors, alumni association, honorary degrees, faculty appointments, international agreements, foundations, research units, interdisciplinary research programs, and research support. Section 2, "Academic and Assessment Information," lists information on degrees and certificates, class size, freshmen test scores, undergraduate grades, degrees by department, and alumni by current residence. The third section, "Student Information," provides data on admission, new and returning students, credit headcount, majors, ethnicity and age, credit hours, and independent learning programs. The fourth section, "Faculty and Staff Information," details information on department, race, sex, salary, tenure status, and a comparison of salaries with those at land-grant university salaries. Section 5, "Budget and Financial Information," lists appropriations history, revenues, financial aid, graduate enrollment, tuition rates, and prices. Section 6, "Research and Public Service Information," looks at fund expenditure, proposals, the top 100 institutes, library data, usage information, computing facilities, cooperative extension statistics, museum statistics and public radio and television information. The final section, "Facilities Information," looks at a building inventory, space use, capacity, enrollments and leased space. Included are extensive tables and a glossary. (JB)

Message From The Chancellor

March 1992

It is a special pleasure to present the 1992 UAF *Fact Book*. The facts as detailed in this document reflect 75 years of progress at the University of Alaska Fairbanks. I have been chancellor now for eight months and I continue to be impressed with our talented students, faculty, and staff. We take pride in our past accomplishments and will continue to take time to celebrate our birthday, even though budget constraints in the coming years will challenge us.

Special anniversary events are occurring throughout the entire year. We opened 1992 anniversary with an anniversary ball. In February a French music and film festival, *Windows on the World*, marked the anniversary. On March 1 we invited the entire community to the Fairbanks campus for hands-on demonstrations, food prepared by our culinary arts students, and a multitude of entertainment activities. March also saw the opera, *La Traviata*, performed in the Davis Concert Hall, an open house by the University of Alaska Press, and Native author Peter Kalifornski visited UAF. A speechfest and Jazz 92 Concert will continue the celebration in April followed by one of our own alumni giving the main address at Commencement. In June the UAF logo will be planted in the crops at the agricultural plots; alumni are planning a weeklong reunion in July as part of the 75th anniversary celebration. The Agricultural and Forestry Experiment Station will host an open house for the community at the farm in August; the Arctic Chamber Orchestra Commemorative Tour takes place in September, and the group will perform a gala concert in October. The Geophysical Institute will present an open house in October, and November and December will be marked by special theatrical and musical performances.

As our enrollment increases steadily and we work together to shape our vision for the year 2000, you can be sure UAF will continue to play a major role in the growth of the state of Alaska.

Chancellor Joan K. Wadlow

Preface and Acknowledgments

The 1992 edition of the *Fact Book* represents our continuing commitment to provide a reliable source of information about the University of Alaska Fairbanks. The *Fact Book* can be used as a convenient reference for answering some of the most frequently asked questions about our institution. By examining these historical and current data, we can better anticipate and plan for the future, promote enhancement of academic programs and facilities, and provide service to the citizens of our state.

Significant changes and additions have occurred in this second edition of the *Fact Book* due to the type of information needed this past year for the academic program review process, the UAF budget, the TQM effort, the 1992 strategic planning process, and research initiatives from the Chancellor. Taken together, these additions will make the information in the *Fact Book* even more relevant in the upcoming year.

Our sincere appreciation is extended to the many individuals throughout the UAF community and the State who contributed to the production of this *Fact Book*.

We are confident that the administration, faculty, staff, students, alumni, and friends of the University will find this publication a convenient, authoritative, and valuable reference of general and statistical information about UAF. Putting this material together involved many judgments as to the inclusion, exclusion and form of presentation. We therefore welcome any suggestions you may have for improving future editions.

Thomas Gaylord
Associate Vice Chancellor

A Basis in Law

The University of Alaska is a constitutionally established state university. The pertinent sections of the Alaska Constitution are cited here.

ARTICLE VII

HEALTH, EDUCATION AND WELFARE

Section 2

The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Section 3

The University of Alaska shall be governed by the Board of Regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the Legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Institutional Mission

The University of Alaska Fairbanks was established in 1917 as the Alaska Agricultural College and School of Mines. Today, as a comprehensive land-grant and sea-grant university, the multi-campus University of Alaska Fairbanks exists as a vital state resource to teach, to inquire and to serve.

The University of Alaska Fairbanks offers instructional programs covering a broad postsecondary spectrum and is the major research center for Alaska. The university is committed to providing a free and open forum where ideas and issues may be professionally pursued and frankly debated in an environment of mutual respect and intellectual integrity. It seeks to provide an intellectually stimulating learning process which is culturally sensitive and empowering to its students. The university is committed to assuring that its graduates receive a balanced education in the arts, humanities, natural and social sciences through which creativity is fostered and historical and philosophic perspectives are gained. As a result, the state benefits from an educated citizenry capable of the independent pursuit of further learning, of contributing to the economic well being of the state and nation and of participating in and contributing to global society. The university seeks a culturally diverse environment that values and promotes equal treatment of sexes, races, cultural and ethnic groups throughout its academic programs, student body, faculty and staff. The University of Alaska Fairbanks as a residential institution of higher education serves students from all of Alaska as well as from other states and nations. It is particularly committed to enhancing educational opportunities for Alaska's rural and native

A Basis in Law (continued)

populations. Through its branch campuses in Bethel, Kotzebue and Nome and its rural education centers, the University is responsive to local and regional needs, including open educational access to its programs. Special strengths exist in the use of educational technology which provide for the distance delivery of selected programs to many areas of the state. In seeking to serve a broad array of students, admission to several associate degree and certificate programs is open to all. Admission requirements to all baccalaureate and graduate programs as well as some Associate of Applied Science degree programs vary depending on the specific field of study.

The University of Alaska Fairbanks offers developmental programs and certificate, associate, baccalaureate and graduate/professional programs in the arts, sciences, career fields and professions. It is a center for graduate education and is Alaska's only doctoral granting institution. It possesses unique strengths in the physical and natural sciences and offers a broad array of engineering programs with a particular emphasis on the stresses of northern environments. UAF is a major center for the study of natural resources including minerals, forestry, wildlife, geology, agriculture, fisheries and ocean sciences and their associated economics. It has been recognized for its work in multi-cultural understanding, rural health problems, and cross-cultural interaction in the human service professions.

As a major center for research and scholarship, the University of Alaska Fairbanks is committed to the mutual enhancement of teaching, research and creative activity, and public service. Scholarship which produces new knowledge instills a vigor into teaching which in turn stimulates inquiry and the quest for further answers to the unknown. The university seeks to use its particular location in the north as a natural laboratory for the study of questions and issues, whose solutions are not only applicable to Alaskan problems but to a broader understanding of our global community. As part of a network of state research universities, this institution has an active program of basic and applied research resulting in a well earned national and international reputation. Specific recognition has been achieved in space physics, marine science, and high latitude biology, environmental sciences, engineering and geophysics. The university has recognized programs in definition, exploration, development and management of Alaska's renewable and nonrenewable resources. It is the state's center for study of Alaska Native cultures and languages.

Through its Cooperative Extension Service and Marine Advisory Program, research results are interpreted and transferred to people of the state. Its continuing education programs extend the expertise of the university to adult learners needing alternative learning opportunities. The university's library and museum provide the state's major information resources and cultural collections with a particular strength in Alaska and polar regions. Finally, through its programs in fine and performing arts, the university provides cultural enrichment to the state's interior and rural populations. In accomplishing this mission, the University seeks the advice and guidance of Alaska's residents and friends.

Board of Regents Policy 10.02.01, adopted 02-25-88

* Since the mission statement was adopted, the University of Alaska Fairbanks has added the Bristol Bay and Interior Campus sites. UAF was granted space grant status in 1991.

Historical Highlights

1915

The University was originally established in 1915 by the United States Congress as a land-grant college, called the Alaska Agricultural College and School of Mines.

The location of the University was selected by one of the early founders of Fairbanks, the Honorable James Wickersham, territorial delegate to the U.S. Congress from Alaska. At that time, Anchorage was only a young tent city, and Juneau, being a center of population and government, had little interest in an agricultural college. The cornerstone laying ceremony was held on the Fourth of July, 1915.

1917

Governor Strong signed the bill May 3, 1917 accepting the federal land grant of 2,250 acres to create the Alaska Agricultural College and School of Mines as a land-grant college committed to public service, teaching and research. A separate corporation was established which provides for a board of trustees.

1921 - Bunnell

Dr. Charles E. Bunnell became the founding president in 1921. He was a judge of the U.S. District Court in Fairbanks for the preceding seven years (a position he assumed after Wickersham defeated him in 1914 for a position as delegate to Congress). Bunnell was appointed by the Board of Trustees (which became the Board of Regents in 1935). His long-time political rival, Wickersham, tried to have the board rescind his appointment.

1922

The "Farthest North College," as it was commonly referred to in its early years, opened on September 18, 1922 with six faculty and six students, in addition to President Bunnell and his secretary. The total student body rose to 12 after late enrollments. The first annual Commencement Exercises were held in 1923 with one graduate, Jack Sexton Shanley, who received his Bachelor of Science degree in Agriculture. President Warren Harding also visited the campus that year.

The Bureau of Mines station was transferred to the College in 1924. Other developments included the graduation of the first woman, Margaret E. Thomas (later Mrs. Olaus Murie) in business administration, the establishment of the U.S. Bureau of Biology Survey Station in 1926, the organization of the Business Administration Club in 1927, and the formation of the Civil Engineering Society in 1929. The first Bunnell-Geist Expedition to St. Lawrence Island occurred in 1927. The College received an appropriation from the Rockefeller Foundation in 1929 to study the aurora borealis.

The Fairbanks Agricultural Experiment Station, which had been established in 1906, was transferred to the College by an act of Congress in 1931. The Matanuska Agricultural Experiment Station was transferred to the College the following year.

Historical Highlights (continued)

Signers' Hall was built in 1931 to be the campus gymnasium. Later it would serve as the library, then the museum. Currently, Signers' Hall is the UAF administration building.

1935

In 1935 the Territorial Legislature approved a name change on July 1, and the Alaska Agricultural College and School of Mines became the University of Alaska. Enrollment was up to 150 with 18 faculty members. Dr. and Mrs. Froelich Rainey built the Rainey/Skarland cabin in 1936.

World War II

Wartime enrollment was 67 in 1943-44, but increased to 373 in 1946-47.

The Geophysical Institute was created in 1946 by an act of Congress. The College of Magnetic and Seismological Observatory was built in 1947, and the first summer session on the campus was held the same year.

1949 - President Moore

Dr. Terris Moore served as the second president of the University from July 1949 to October 30, 1953. Arthur Nagozruk Jr., of Barrow, was the first Alaskan Eskimo to graduate from the university. The Chapman Building (the original Geophysical Institute) was completed, as well as Nerland Hall and the Brooks Building. Eielson Building construction, started in 1934, was finally completed in 1950. Enrollment reached 409 in 1953, and courses were offered on several military bases in the State.

1953 - President Patty

Dr. Ernest N. Patty, a faculty member in 1922, and Dean of the College from 1925-35, returned as the University's third president in 1953. Construction continued with the expansion of the physical plant, and completion of three more dormitories and two married-student apartment buildings. The Bunnell Building was constructed, and Constitution Hall was completed in time to accommodate the Alaska Constitutional Convention in November 1955. Enrollment rose to 978, and community colleges were established in Anchorage, Ketchikan, and Juneau. The first Ph.D., in space physics, was conferred at the annual Commencement Exercises in 1957. In 1959, with governor Bill Egan presiding, Alaska's constitution was signed in Signers' Hall.

1960 - President Wood

Dr. William R. Wood became the fourth president in 1960, guiding the University through its first year of Alaska statehood. The next 13 years saw greater funding for university operations and physical plant development, along with a broadening of academic, research, and public service programs. In 1964, three regions were

Historical Highlights (continued)

established—Northern, Southeastern and Southcentral—each with a provost to coordinate and direct activities. Community colleges were organized at Palmer, Sitka, Kodiak, Bethel and the Kenai Peninsula. Regional centers were established at Anchorage and Juneau, augmenting community college programs with upper-division and graduate studies. The Fairbanks campus grew to include a new residence hall complex, gymnasium, classroom buildings (Charles E. Bunnell Building in 1960, William E. Duckering Building, 1964, Ernest Gruening Building, 1972), a heating and power plant, a library/fine arts complex (1969), and campus activity center (Ernest N. Patty Center, 1963), and further expansion of research facilities on the West Ridge. The Alaska Water Laboratory and the new Geophysical Institute were among new facilities on the West Ridge. The Institute of Marine Science was established by the Alaska Legislature in 1960, the Mineral Industry Research Laboratory in 1963, as well as the Institute of Arctic Biology. In 1969, Poker Flat Research Range was established as the largest land-based and only high-latitude university-owned sounding rocket range in the world. In 1970, the university was named a sea-grant institution.

After 1968, university construction expanded from the Fairbanks campus to Anchorage and Juneau. Student enrollment in Fairbanks reached 3,158 in the fall of 1972. Overall enrollment statewide rose from 1,630 in 1960 to 10,325 in 1972, increasing at an average annual rate of close to 17 percent.

1973 - President Hiatt

Dr. Robert W. Hiatt succeeded President Wood in 1973. The University of Alaska Foundation was established in 1974, encouraging private giving to the University. The Alaska Native Land Claims Settlement Act passed in 1971. With the development of village and regional Native corporations, the need for greater educational opportunities in rural areas of the state developed. In response to this, the university administration and Native leaders conferred to determine the best way to meet critical needs. In 1975, President Hiatt instituted a sweeping reorganization of the university, allowing considerable development of higher education programs in rural Alaska. The position of vice president for rural educational affairs was created. The regional system was abandoned to better emphasize development of the major urban centers in Fairbanks, Anchorage and Juneau. A Chancellor was appointed at each campus with responsibility for all research and academic programs. The positions of vice president for research and vice president for academic and faculty affairs were abolished, and the six existing colleges and seven research institutes at UAF were merged into two colleges - Environmental Sciences, and Arts and Sciences—and the Division of Professional Schools. Statewide administration and the Office of the President remained in Fairbanks.

1974

Tanana Valley Community College was established in Fairbanks. A learning center was opened in Barrow in 1974, followed by the Northwest Community College at Nome in 1975.

Historical Highlights (continued)

1976 - Chancellor Cutler

Dr. Howard Cutler became Chancellor of the University of Alaska Fairbanks in 1976. In 1977, regents approve a reorganization plan under which education services are provided by four basic units--the University of Alaska Fairbanks; University of Alaska Anchorage; University of Alaska Juneau; and the Division of Community Colleges, Rural Education and Extension. Program expansion included petroleum engineering, computer technology and resource management. The University of Alaska Museum was relocated to the Otto Geist Building on West Ridge in 1980.

1977

Charles O. Ferguson is appointed interim president by the Board of Regents in February. At an August meeting, regents announce the selection of Neil D. Humphrey as president of the University of Alaska and appoint their executive secretary, Foster F. Diebold, as chief administrator of the University, pending appointment of a new president, after Ferguson's resignation in December.

Regents approve a reorganization plan proposed by UA President Humphrey under which education services are to be provided by four basic units -- the University of Alaska Fairbanks; University of Alaska Anchorage, University of Alaska Juneau, and the Division of Community Colleges, Rural Education and Extension.

In February, regents appoint Diebold as president of the University for a term ending June 30, 1979.

Regents announce the appointment of Dr. Jay Barton as the eighth president of the University of Alaska.

1981 - Chancellor O'Rourke

In 1981, Dr. Patrick J. O'Rourke, previously chancellor of the Community Colleges, Rural Education and Extension division, became the Chancellor of the University of Alaska Fairbanks. Enrollment at UAF tops 5,000 for the first time.

Program expansion included a new Northern Studies program and doctoral degrees in mathematics, fisheries and biochemistry. The College of Human and Rural Development was created in 1982. In 1983, the Honors Program began accepting students and the following year International Programs is established.

Constitution Park was completed in 1982 to honor the Alaska delegates that drafted and signed the Alaska State Constitution. The park is located between Constitution Hall, the Fine Arts Complex and the Gruening Building. The Student Apartment Complex was completed in 1984.

Historical Highlights (continued)

Restructuring

In 1987 President Donald O'Dowd and the Board of Regents restructured the University of Alaska System, streamlining administration and giving the state's four-year institutions in Anchorage, Juneau and Fairbanks responsibility for former community college missions. UAF's responsibilities include campuses in Bethel, Nome, Kotzebue, Bristol Bay and the Interior.

1988

The importance of Alaska as a site for receiving, processing and archiving data from earth-orbiting environmental satellites is demonstrated in 1988 when the Synthetic Aperture Radar (SAR) is installed on top of the Geophysical Institute. UAF's reputation grows internationally as the Polar Ice Coring Office (PICO) moves to Fairbanks.

1990

Known for its high-latitude social and scientific studies, on a per-researcher basis, UAF receives more NSF funding than any other university in the United States.

In September 1990 Chancellor O'Rourke announced his decision to step down as chancellor at the end of June 1991.

1991

In February of 1991, the University of Alaska Fairbanks was designated a Space-Grant Institution by the National Aeronautics and Space Administration (NASA). This grant was in recognition of UAF's nationally competitive aerospace research and educational programs.

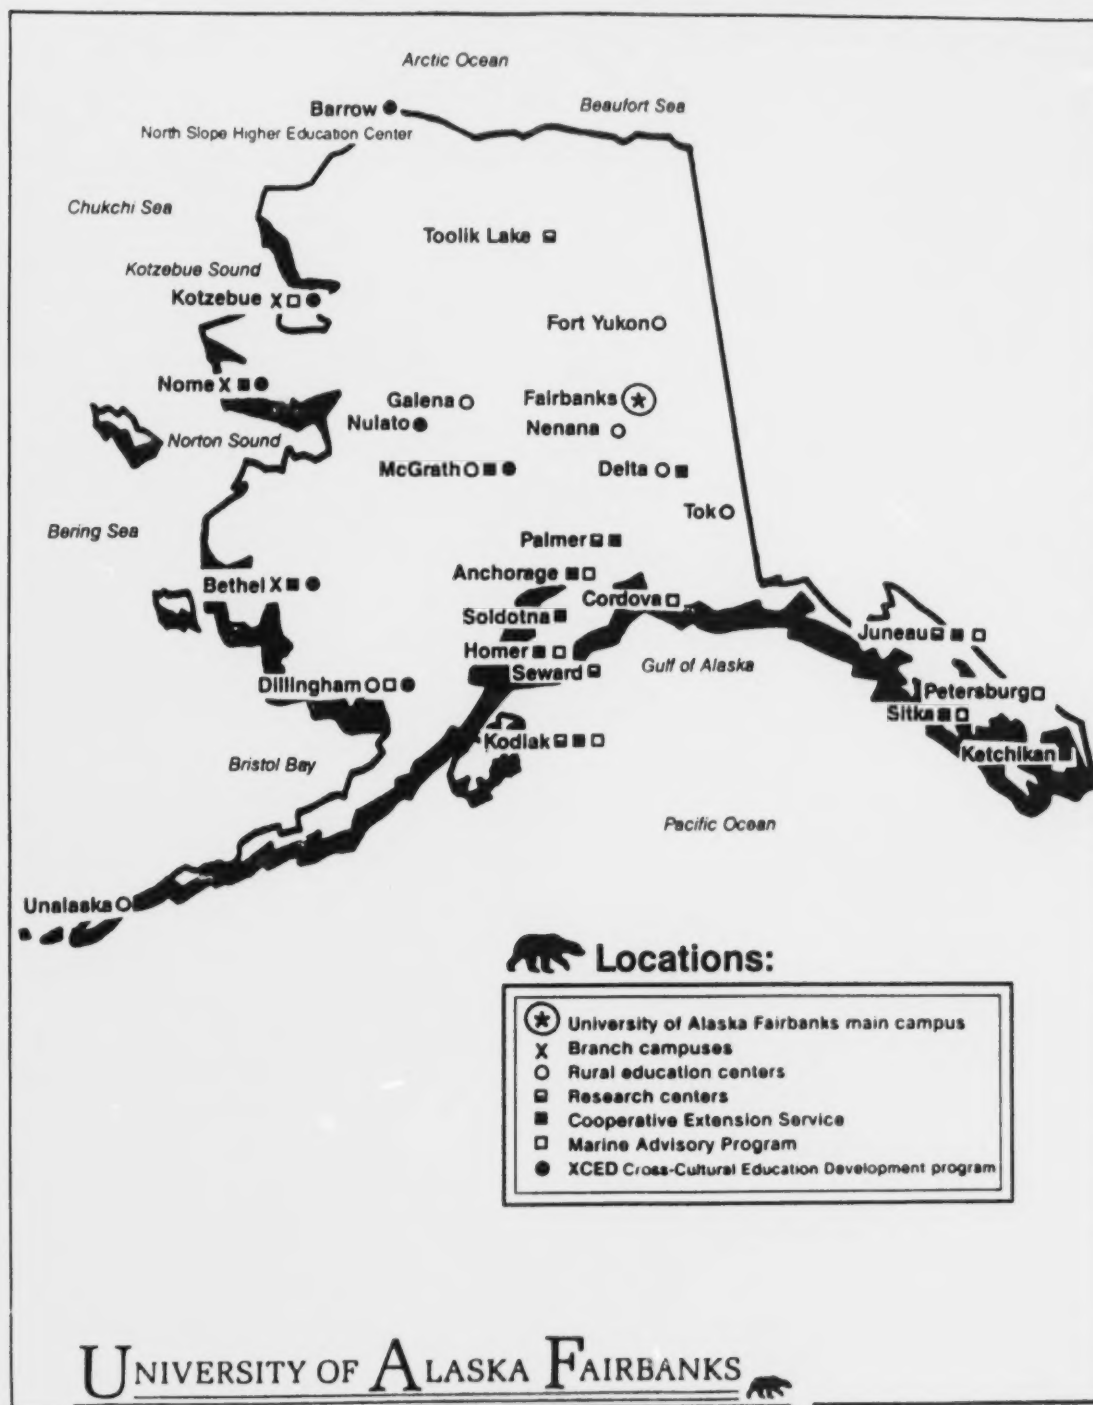

1991 - Chancellor Wadlow

Dr. Joan K. Wadlow becomes the third chancellor of UAF on July 1, 1991 and the first woman to be named Chancellor anywhere in the UA system. UAF is named the best of western regional institutions, based on costs and academic quality, by *U.S. News and World Report*.

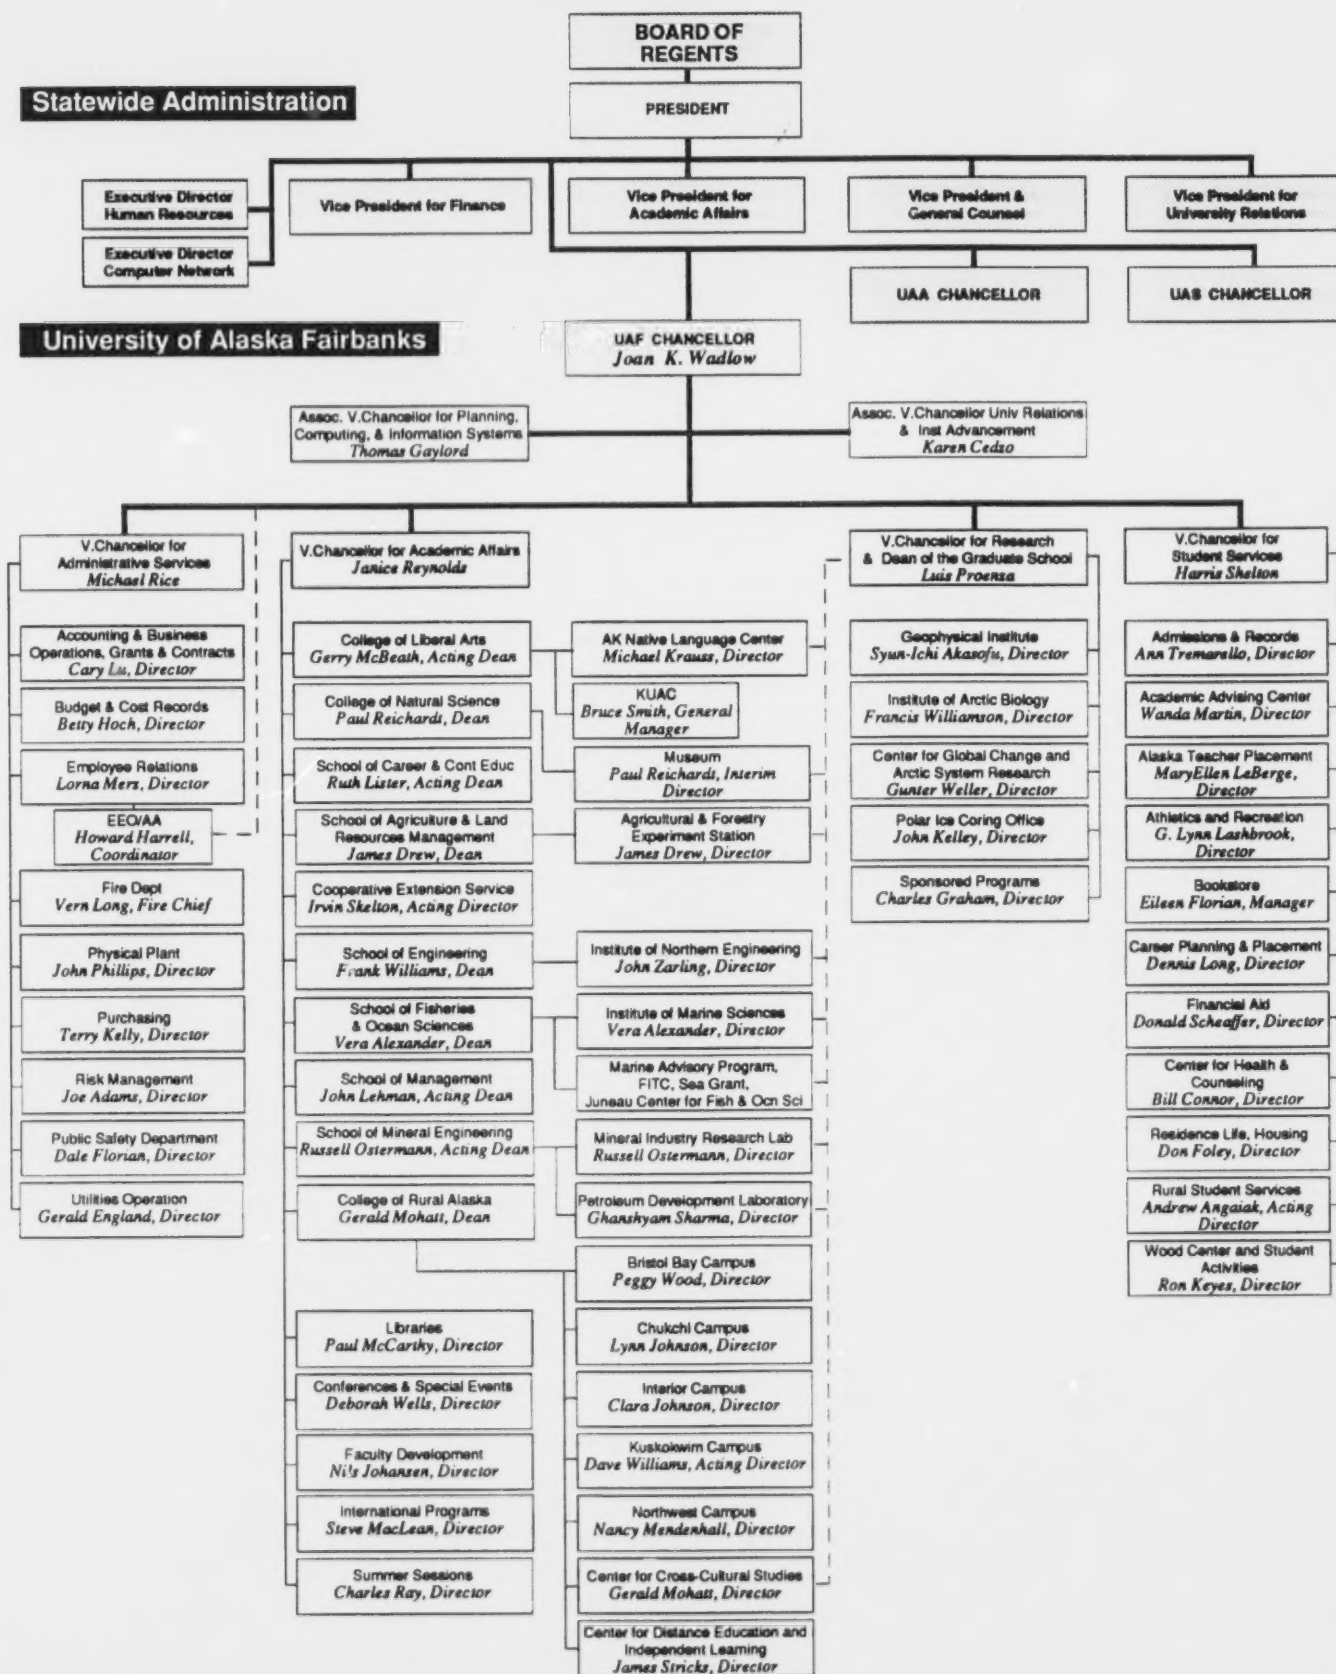

1992

The University of Alaska Fairbanks celebrates the 75th Anniversary of its founding.

UAF Statewide Outreach

Organizational Structure

Institutional Accreditation

Commission on Colleges of the Northwest Association of Schools and Colleges

SPECIALIZED ACCREDITATIONS

Accreditation Board for Engineering and Technology

Accrediting Council on Education in Journalism and Mass
Communication

National Council for Accreditation of Teacher Education

University of Alaska System Board of Regents

The University of Alaska Board of Regents is the governing body responsible for university policy and management through the president. Regents are appointed by the governor for eight-year terms, subject to legislative confirmation. A student regent is appointed for two years from candidates nominated on each campus. Regents' terms of office shown in parentheses.

Robert F. Williams, President (1985-1993)
Morris Thompson, Vice President (1989-1993)
Susan A. Stitham, Secretary (1987-1995)
Mark H. Helmricks, Treasurer (1987-1995)
Virginia W. Breeze (1989-1997)
Eric Forrer (1989-1997)
Sharon D. Gagnon (1991-1999)
Joseph R. Henri (1991-1999)
Michael P. Kelly (1991-1999)
Tim Lamkin (1991-1992)
Lew M. Williams, Jr. (1991-1999)

UAF Standing Committees and Advisory Groups

Art in Public Places Committee

Michael L. Rice, Vice Chancellor for Administration

UAF Alma Mater and Fight Song

Lyrics by Mary J. Walker and Carl M. Franklin

Music by Carl M. Franklin

Though far we wander from thy door,
following paths of golden lore,
With love and pride we think of thee,
Rev'ling in treasured memories.
'Neath sparkling stars and northern lights,
Hills crest halls gleam stately white,
Inspiring love and faith to glowing flame;
Our Alma Mater we revere thy name.

CHORUS

All hail Alaska, sing her praise;
Our home of carefree college days.
A pioneer we see thee stand,
Champion of far north frontier land.
Thy sons and daughters e'er we'll be,
Forever loyal and true to thee,
Imbued with love we sing glad acclaim,
Our Alma Mater we praise thy name.

FIGHT SONG

Words and music by Carl M. Franklin

Fight for Alaska win the victory!
Fight for the Blue and Gold.
Hail to our banner, as it waves so free,
Over the victor's fold.
Cheer for the Polar Bears, mighty men are they,
Onward to honor and fame!
Fight on to win for our Alma Mater, Fight for Alaska's name.

Presidents/ Chancellors of the Institution

- 1921 The board of trustees selected Dr. Charles E. Bunnell, judge of the U.S. District Court at Fairbanks, as the college's first president. Bunnell assumes the position on December 7.
- 1949 Dr. Terris Moore, a former president and trustee of the Boston Museum of Science, assumes the presidency on July 1.
- 1953 Moore is succeeded by Dr. Ernest Patty, a member of the original faculty in 1922 and dean from 1925-35.

Presidents/ Chancellors of the Institution (continued)

- 1960 Dr. William R. Wood, former academic vice president and acting president of the University of Nevada, succeeded Patty as president of the University, one year after Alaska became a state.
- 1973 Dr. Robert W. Hiatt succeeded Wood as the University's fifth president. Hiatt reorganizes the University in 1975, ending the regional system, and appoints chancellors to head the Fairbanks and Anchorage units.
- 1976 Dr. Howard A. Cutler assumed his duties as the first chancellor of the University of Alaska, Fairbanks.
- 1981 Dr. Patrick J. O'Rourke succeeded Cutler as UAF's second chancellor.
- 1991 Dr. Joan K. Wadlow became the third chancellor of UAF and first woman chancellor in the UA System.

UAF Alumni Association

The UAF Alumni Association provides alumni with opportunities for involvement and interaction with the institution and with each other in social, cultural and/or educational areas, as well as providing support to current students. The association is managed by a board of directors, who are elected by the active membership. Each position on the eleven member board represents a geographic area. The association promotes the general welfare of UAF, through the efforts of UAF graduates and former students.

Board of Directors

Jean K. Anderson Graves '54 - Seat 1, At Large
 Caroline Bolar '77 - Seat 10, Southcentral
 Dale Fox '77 - Seat 4, Southcentral
 Linda C. Dahl Gordon '65 - Seat 3, Interior

Faculty National/ International Appointments

Dr. Knut Stamnes: (Professor of Physics) named one of five site scientists by the U.S. Department of Energy's Atmospheric Radiation Measurement (ARM) Program. Dr. Stamnes will be responsible for the day-to-day scientific operations of the ARM Program's measurement site to be located over 25,000 square miles on the North Slope of Alaska.

Dr. John Kelly: (Director of UAF's Polar Ice Coring Office) named one of the administering directors of the first International Design for Extreme Environments Assembly (IDEEA One). The international assembly's goal is to form a permanent and expanding worldwide network to provide mechanisms for common problem solving in extreme environments, including space exploration.

Karen L. Cedzo: (Associate Vice Chancellor for University Relations and Institutional Advancement) 1992 chair of the Educational and Cultural Organizations Section of the Public Relations Society of America (PRSA) and 1992 chair of the Council on University Relations and Development of the National Association of State Universities and Land Grant Colleges (NASULGC).

Dr. Luis Proenza: (Vice Chancellor for Research) named Chair-Elect for 1993 by the Council on Research Policy and Graduate Education of the National Association of State Universities and Land Grant Colleges (NASULGC).

Dr. Thomas Gaylord: (Associate Vice Chancellor for Planning, Computing and Information Systems) elected to the board of directors of the Pacific Northwest Association for Institutional Research and Planning.

Faculty National/ International Appointments (continued)

Dr. David Hopkins: (Alaska Quaternary Center) received the Fryxell Award from the Society of American Archaeology recognizing his contributions. This is the most prestigious national award given by the SAA and only the most distinguished senior scholars are considered. In 1990 received the Career Award of the Geoarchaeological, Division of the Geological Society of America.

Dr. Wilford Weeks: (Geophysical Institute) recipient of the International Glaciological Society's highest honor, the Seligman Crystal.

Dr. Vera Alexander: (School of Fisheries and Ocean Sciences) named a Fellow by the Council of the American Association for the Advancement of Science; serves on the National Academy of Sciences Polar Oceans Panel and the Arctic Marine Science Committee; serves on the U.S. delegate to the North Pacific Marine Science Organization (PICES).

Dr. Thomas C. Royer: (Institute of Marine Science) serves on the National Academy of Sciences, Associateship Review Panel, since 1981; serves on the Publications Committee, American Geophysical Union; received Editors Award for service to *Journal of Geophysical Research Oceans*, American Geophysical Union - 1990; serves as co-chairman, WOCHE Hydrographic Implementation Panel.

Dr. Juan G. Roederer: (Geophysical Institute) appointed by President Reagan as chairman of the U.S. Arctic Research Commission in 1987.

Dr. Gunter E. Weller: (Geophysical Institute) member of the Committee on Global Change Research, National Research Council; serves on the Council of International Glaciological Society; serves as chairman of the Working Group on Global Change, International Arctic Science Committee; serves as chairman of the IGPP Steering Committee, Scientific Committee on Antarctic Research.

Dr. Carl S. Benson: (professor emeritus, Geophysical Institute) a Fellow of the American Association for the Advancement of Science.

University of Alaska Foundation

The Foundation is legally separate and distinct from the University of Alaska and is governed by its own Board of Trustees. This twenty-three member board establishes the Foundation's investment policy for endowments, manages donated property, and oversees the distribution of the Foundation's assets to its sole beneficiary, the University of Alaska system. Total FY91 assets were \$19.3 million.

The membership of the Foundation consists of its College of Fellows which is organized into three branches and an unaffiliated group. Each branch operates to support the fund-raising efforts of its respective university. In addition, members of all branches of the College of Fellows assist the Trustees in fundraising at the statewide level and act as advocates for the University in community and state issues.

Principal Research Units At UAF

The University of Alaska Fairbanks Special Mission states: "The University of Alaska Fairbanks is the State's center for organized activity in basic and applied research with particular emphasis on high latitude and Alaskan problems which have provided this University with a well-earned national and international reputation. Foci are directed toward marine science and high latitude studies in geophysics, biology, environmental sciences, and engineering disciplines. It will further conduct studies relative to the definition, exploration, and development of Alaska's natural resources, with a special emphasis on agriculture and minerals."

This mission statement, taken with UAF's actual research activities, define UAF as "The Arctic Institution for the United States" and "America's University of the North."

Within the areas of emphasis identified above, and in support of the overall academic program, UAF research institutes, centers, and laboratories have been organized under the Vice Chancellor for Research and Dean of the Graduate School to facilitate "the institution's two main responsibilities in promoting research: to aid members of the faculty in developing and maintaining their research programs, and to provide a central point of contact for off-campus agencies turning to the institution for research assistance," (*NASC Accreditation Handbook*, p. 73).

The Vice Chancellor directly administers several programs and facilities to promote research at UAF. Funding initiatives include the Faculty Small Grants Program and the National Institutes of Health-funded Biomedical Research Grants Program. Other initiatives are funded on a limited and discretionary basis to assist in the development of critical areas.

Agricultural and Forestry Experiment Station

Land Grant: The School of Agriculture and Land Resources Management and the Agricultural and Forestry Experiment Station continue the Land Grant tradition. Their research and public service activities emphasize practical applications and solutions to problems facing Alaskans and others in the circumpolar north.

Delta Research Site: One hundred miles southeast of Fairbanks, UAF researchers study carbon cycling in the Delta Agricultural Project, to gain insight into the effects of global warming. In basic agronomic research, UAF scientists emphasize production techniques, and crop selection appropriate to high latitude lands in order to boost yield while protecting the soil and minimizing production costs.

Forest Soils Laboratory: Research conducted by the Laboratory emphasizes the soil fertility controls of forest development in interior Alaska forests. Facilities are available to students and collaborating investigators for conducting soil, plant tissue and water analysis for all major physical and chemical properties of these materials.

Fairbanks Research Center/Experiment Farm: For more than three-quarters of a century, interior Alaskan farmers have benefited from basic agricultural; and conservation studies conducted at the Fairbanks Experiment Farm. Today's researchers are investigating ways to increase yield while meeting Alaska's special environmental needs. Horticulture, small fruits, swine, and grain are some of the Center's major areas of study.

Principal Research Units At UAF (continued)

Palmer Research Center/Matanuska Farm: Located in the Matanuska Valley—Alaska's traditional agricultural center—the Palmer Research center concentrates its research efforts on developing new production techniques for the area's agricultural industry. Major research efforts in dairy, vegetable, and beef production result in lower costs to Alaskan consumers and higher return for the state's producers. Studies are conducted at the University's Matanuska Farm, and on cooperating privately owned local farms.

Bonanza Creek Experimental Forest: The Taiga LTER (Long-Term Ecological Research program) site, located at Bonanza Creek, is part of a 19-site, National Science Foundation funded national network. It was established in 1987, four years after a major fire at Rosie Creek burned one-third of the experimental forest. At the Bonanza Creek site, UAF researchers, in cooperation with the Institute of Northern Forestry (U.S. Forest Service) and scientists from other universities, focus their studies on the process that control forest development on flood plains and uplands after fire.

Alaska Cooperative Fish and Wildlife Research Unit

This unit is jointly sponsored by UAF, The Alaska Department of Fish and Game, and the U.S. Fish and Wildlife Service. Research emphasis is on the ecology and fisheries of aquatic ecosystems, alteration and contamination of Alaskan freshwaters, and development of coldwater fishery techniques. The wildlife-related studies focus on ungulate habitat relationships, waterfowl and seabird ecology, wildlife population dynamics, and the impact of northern development on wild animals and their habitats.

Alaska Native Language Center

The Alaska Native Language Center was established by state legislation in 1972 to document, study and cultivate the twenty native Indian, Aleut and Eskimo languages of Alaska. It houses an archival collection of about 8,000 items, virtually everything written in or about Alaska Native Languages, including copies of most of the earliest linguistic documentation. The Center has published over 200 books and booklets for scientific, classroom and general use, including grammars, dictionaries, and folklore texts and audio tapes.

Center for Cross-Cultural Studies

The Center for Cross-Cultural Studies is the research and development unit of the College of Rural Alaska and addresses the unique educational issues and problems inherent in Alaska's multicultural population. The Center administers instructional support contracts and grants for the College and issues publications and reports designed to improve cross-cultural understanding.

Principal
Research Units
At UAF
(continued)

Geophysical Institute

The Geophysical Institute is the only high-latitude research and academic center for geophysics in the United States. Focused on high-latitude geophysical phenomena. The scientific staff is organized under four research groups: Atmospheric Sciences, Space Physics and Aeronomy, Solid Earth Research, and Snow, Ice, and Permafrost. The Institute participates with other universities and agencies in many cooperative research programs. The following special facilities and projects are operated by the Institute.

Poker Flat Research Range is the largest land-based research rocket range worldwide and the only high-latitude range in the United States. Since it was established near Fairbanks in 1969 for auroral and middle-to-upper atmosphere research, approximately 234 large sounding rockets have been launched. A major federal project to upgrade launch and observatory facilities is now under way.

Optical Observatories: The Institute's main optical observatory is at Poker Flat Research Range and the Institute participates in an observatory at Svalbard, Norway. Observations using satellite communications are made from unmanned all-sky cameras located at remote sites in Alaska and Canada. Downrange observation sites for Poker Flat are at Fort Yukon, with sites planned at Arctic Village and Kaktovik; an optics lab supports these activities.

The Space Physics Analysis Center is equipped with hardware and software to acquire data and images of solar activity and related geophysical phenomena. The system displays the NOAA solar-geophysical data file on sunspots, solar flares, and the solar wind.

The High Frequency Active Auroral Research Program (HAARP) is a federal project for experiments to modulate the electric power in the earth's ionosphere. A powerful, high-frequency transmitter system is planned for a site north of Fairbanks to conduct and monitor experiments. HAARP is managed by the U.S. Air Force Geophysics Laboratory and the U.S. Navy Office of Naval Research. The Institute leads the *Polar Radio-Science Consortium*, a multi-agency scientific advisory group for HAARP.

Space Grant: NASA has designated UAF to participate in the National Space Grant program and will fund teaching and research in aeronautics, space, and related fields. The Institute has been funded to conduct the program, which will provide students internships in private industry and promote cooperative industry-university research.

The Alaska Volcano Observatory (AVO), a cooperative program with the Alaska Division of Geological and Geophysical Surveys and the U.S. Geological Survey, links laboratories in Alaska, Washington, and California by computer to monitor hazardous Alaskan volcanoes and conduct cooperative research. AVO also provides public safety information to the Federal Aviation Administration, NOAA, the Alaska Division of Emergency Services, municipal governments, and the public.

Principal
Research Units
At UAF
(continued)

Seismic Information and Research: Monitoring earthquake activity and providing information to citizens and public officials, the Alaska Earthquake Information Center is a cooperative project with the USGS. The network of 120 seismic stations monitored by the Institute seismology laboratory includes stations of the Institute, the USGS and NOAA's Alaska Tsunami Warning Center. The office of the Alaska state seismologist is located at the laboratory, which also supports basic research on earthquakes and volcanoes.

Geological Research Support includes a geochronology lab equipped for argon-argon and potassium-argon dating of geologic samples. The paleomagnetism laboratory, used for research on Alaska's tectonic history and climate records of young sediments, is equipped with a 2-G superconducting magnetometer. A third laboratory is equipped for preparing samples for geochronologic, magnetic, and geochemical analysis.

The Tectonics and Sedimentation Group of the Institute and the UAF Geology Department conduct the Brooks Range Geologic Research Program, a major, long-term research effort to understand the geologic history of the northeastern Brooks Range and provide basic information for resource evaluation.

Snow, Ice, and Permafrost Laboratories: The Institute houses three ice laboratories and three cold rooms for permafrost studies, ice core analysis, glaciological research, studies and other research requiring simulated cold environments.

The Alaska Climate Research Center concentrates on research of Alaskan climatology and climatic trends and on answering requests for digitized climatic data, maintaining a relationship of mutual cooperation and support with the UAA Climate Center.

Atmospheric Sciences Laboratories: The Institute houses a physical chemistry and optics laboratory and operates an atmospheric chemistry laboratory in a nearby building. Atmospheric chemistry measurements are routinely made from the Ester Dome Observatory near the Institute and at Poker Flat.

Remote Field Sites: Much seismology, magnetic, and auroral observing equipment is located at field sites throughout Alaska and northwestern Canada; most sites involve continuously operating, unmanned observing stations. The Alaska-Canada High Latitude Magnetic Chain of Stations is a series of magnetometers following a longitudinal line from Talkeetna, Alaska to Eureka, NWT, Canada. Information from the chain is transmitted via satellite to the World Data Center. A digital ionospheric sounding system at the Sheep Creek site is operated for the Air Force Air Weather Service.

The Alaska Synthetic Aperture Radar (SAR) Facility, funded by NASA, is designed to receive, process, and archive data from a new generation of synthetic aperture radar satellites to be launched during the 1990s. Its major components are a receiving ground station, SAR processor system archive and operations system, a derived products system for nonroutine scientific analysis of SAR data.

Principal Research Units At UAF (continued)

Satellite Image Analysis Laboratories: In addition to the Alaska SAR Facility resources, the Institute houses the Alaska Data Visualization and Analysis Laboratory (ADVAL; more fully described under Center for Global Change and Arctic System Research, below). ADVAL provides analysis of satellite images in conjunction with other data sets.

The Geo-Data Center archives institute material, maintains various geophysical data collections to support research, and is the public browse facility for the Alaska High-Altitude Aerial Photography Program. Collections consist of various media, from 16mm educational movies to 8mm digital satellite imagery, from earth current chart data to positive CIR aerial transparencies. NOAA/AVHRR Satellite Imagery, Landsat Quick Look Satellite imagery are available and SPOT satellite images may be accessed through the Center.

The Computer Resources Center manages facilities capable of handling large-scale data analysis, satellite image processing, modeling of geophysical process, and nonlinear plasma simulations.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

Research Support Services available include the machine shop which supports needs of the Institute and of the Polar Ice Coring Office at UAF; the electronics shop supports computing, electronics design and construction, and instrument calibration; Photo-Graphics provides photographic, drafting, mapping, and computer graphics services.

Center For Global Change and Arctic System Research

This campus-wide Center was initiated by the faculty in 1990 as a means for developing, coordinating, implementing interdisciplinary research initiatives, linking many initiatives and resources at UAF, and addressing the role of the Arctic in the total Earth System. Its scientific focus is on understanding the chain of physical, geological, biological, and social processes of the arctic system that interact with the total Earth system and global change, in order to contribute to the scientific basis for predicting effects of environmental changes, and formulating policy options in response to the anticipated effects on man and his support systems.

The Center is guided by a Board of Directors constituted of appropriate Deans and Institute Directors, and a Science Steering Committee of faculty from relevant disciplines which provide leadership to five working groups: Physical/Biological Interactions and Feedbacks; Arctic Paleoenvironments, Contribution of High Latitudes to the Global Carbon Budget; Terrestrial Ecosystem and Community Dynamics; Social Aspects of Global Change in the Arctic.

The Alaska Data Visualization and Analysis Laboratory supports digital image processing and geographic information system analysis, especially as they relate to global change research. Its capabilities are relevant to such fields as remote sensing, environmental sciences, geology, geophysics, geography, glaciology, volcanology, land resources management, forestry, oceanography, and mineral exploration and engineering.

Principal Research Units At UAF (continued)

Institute of Arctic Biology

The Institute of Arctic Biology is the principal research arm for life scientists in the College of Natural Sciences and is located in the Lawrence Irving and the Arctic Health Research Building; it provides a vivarium, animal quarters, surgery and a variety of technical and instrument facilities and services. Areas of study include adaptations of plants, animals, and humans to past and present climates of the Arctic, and well-developed programs in ecology, systematics, and molecular biology/biochemistry.

Ecology programs include research on taiga and tundra sites, including community organization, ecosystem structure and function, functional interactions and interdependencies of plants and animals and the way in which environmental and organismal processes modify nutrient cycling and decomposition within systems. These studies on ecosystem research are closely tied to physiological and biochemical processes of microorganisms, plants and animals, emphasizing coevolved responses (e.g. herbivory) which are supported through strong programs such as chemical ecology. Systematics of organisms within arctic and subarctic systems is being studied to establish mechanisms that provide for maintenance of heterogeneity in members of isolated communities.

Special Field Sites: The Experimental Biological Reserve is a 40-acre campus research area providing convenient access to local populations of biota for instruction and research. The Large Animal Research Station, adjacent to the campus, supports breeding colonies of muskox, caribou and reindeer for nutritional, metabolic, and breeding studies.

Research Field Camps, at Cantwell, (near Denali National Park), and Halibut Cove (on the shores of Kachemak Bay) provide a wide range of ecological diversity for research.

Toolik Field Station: The Toolik Field Station is the only major ecological research station in the Arctic, being situated on the tundra, north of the Brooks Range. It serves to support as a second LTER (Long Term Ecological Research) site in Alaska, for tundra ecosystems, in conjunction with the taiga site at Bonanza Creek (see above)12.

Institute of Marine Science

The Institute of Marine Science was established in 1960 and is the major research arm of the School of Fisheries and Ocean Science. Its research foci include interdisciplinary studies of high latitude seas including the Bering and Chukchi Seas and the seasonal sea ice zone; the ecology, biology, and physiology of high-latitude organisms, ranging from plankton to marine mammals; and physical oceanographic studies of the Gulf of Alaska, Bering, Chukchi, and Beaufort Seas. Current research projects include: studies on water circulation in the Gulf of Alaska; carbon and nutrient cycles; environmental studies relating to the *Exxon Valdez* oil spill; marine mammals, shellfish and finfish biology; studies on sedimentation and origin of the continental shelf of Alaska; and satellite remote sensing of ice-covered seas. The Institute includes a variety of research facilities, which are described below.

**Principal
Research Units
At UAF
(continued)**

Seward Marine Center: The Center supports the School's coastal and marine biological research, oceanographic research, and education by providing access to salt water laboratories and access to the coastal environment at the head of Resurrection Bay.

R/V Alpha Helix: The Seward Marine Center is home port for the R/V *Alpha Helix* a 133-ft ice-strengthened research vessel operated by the Institute of Marine Science for the National Science Foundation. The vessel provides living quarters for fifteen scientists and a crew of nine and is used by researchers conducting a wide range of oceanographic studies at high latitudes.

Kasitsna Bay Laboratory: This coastal field station supports teaching and research projects and is an excellent facility for studies of inter-tidal and near-shore organisms and environments. It is located eight miles from Seldovia on the south shore of Kachemak Bay. The facility includes a small laboratory, skiffs, and housing for 16.

West Coast National Undersea Research Center: The Center was established in 1990 by an award from the National Oceanic and Atmospheric Administration's National Undersea Research Program. The Center makes available, on a competitive basis, marine research tools such as manned submersibles and remotely operated vehicles. The area served by the Center includes the entire west coast of the United States and Antarctica.

Flow Cytometry Facility: The development of high resolution flow cytometry at UAF has enabled rapid counting, measurement, sorting, and biochemical analysis of small microorganisms, such as aquatic bacteria. Marine bacteria represent a large proportion of the ocean biota, and flow cytometry is helping to develop better understanding of their role in marine ecosystems. Analysis and sorting of other particles such as algae, spores, blood cells, and blood parasites is possible.

Juneau Center, School of Fisheries and Ocean Sciences

The Juneau Center, School of Fisheries and Ocean Sciences is located on Auke Bay near Juneau. Research areas at the Center include genetic improvement of salmon broodstocks, aging and growth of larval fish, population dynamics, and management of marine fish and invertebrates. The Center operates the 42-ft R/V *Maybeso* in the inland waters of southeastern Alaska.

Fishery Industrial Technology Center

The Center, an applied research arm of the School of Fisheries and Ocean Sciences, was established in 1981, and is located in a new 20,000 sq. ft. facility in Kodiak. The Center's activities are divided into four major areas—fish harvesting science and technology, seafood processing science and technology, technology transfer, and instruction. Present research include studies of functional properties of fish proteins, microbial contamination in seafoods, fish behavior during capture by trawl gear, developing methods for full utilization of fishery products, and development of new salmon products.

Principal Research Units At UAF (continued)

Alaska Marine Advisory Program

The focus of this program, operated by the School of Fisheries and Ocean Sciences, is technology and information transfer. Its faculty and staff are distributed throughout coastal communities of the State, where they assist residents in such activities as development of new fisheries, marine safety, improved harvesting methods, aquaculture, use of improved handling and storage methods, and analysis of opportunities for marine education and tourism.

Alaska Sea Grant College Program

The Program was established in 1970 and earned Sea Grant College status for the University in 1980; it is administered by the School of Fisheries and Ocean Sciences. It promotes the wise use of marine and coastal resources through providing support for research, education and advisory services. Its staff regularly participates in state and national discussions on fisheries management and development, marine mammal issues, and environmental issues which are important to the long-term viability of marine resources based industries based on marine resources.

Institute of Northern Engineering

The Institute of Northern Engineering (INE) is the research arm of the School of Engineering. INE is comprised of three research centers and one laboratory: the Engineering Research Center, the Transportation Research Center, the Water Research Center, and the Environmental Technology Laboratory. INE's objective is to provide faculty and students with research opportunities in support of the engineering programs offered by the School of Engineering. Research through the Centers is conducted in the program areas of civil, electrical, environmental, management, mechanical, and transportation engineering. A special focus exists on cold regions problems as well as water-related problems in Alaska and other northern areas. Many of the research programs conducted at INE investigate problems of particular concern to Alaska, while others are of interest to the national and international communities as well.

Engineering Research Center: Ongoing research at the Engineering Research Center encompasses a diversity of fields ranging from basic investigations of geomagnetically induced currents in power systems (conducted in cooperation with the Geophysical Institute) to the design and testing of a solar assisted culvert thawing system. Some research is quite "high tech", while other projects might seem mundane—yet all work at INE is aimed at providing timely and practical solutions to problems that affect everyone.

Transportation Research Center: As the focal point of Alaskan transportation research for the Alaska Department of Transportation and Public Facilities (DOT&PF), the Transportation Research Center has had a major impact in Alaska, particularly where transportation infrastructure needs to be developed and researched as a necessity for the industrial development and economic growth of the state. TRC

Principal
Research Units
At UAF
(continued)

serves a major role in conducting research and administering transportation education in Alaska. Research projects address such areas as pavement materials, pavement design and rehabilitation, bridges and transportation planning, and traffic operations. Many of these projects are conducted jointly with DOT&PF. TRC is a member of the Transportation Northwest Regional Center (TRANSNOW), and serves as a liaison representing the University of Alaska at the Transportation Research Board in Washington, D.C.. The Alaska Transportation Forum, an annual meeting hosted by TRC, addresses the unique problems of Alaskan transportation. TRC has also developed the Alaska Cooperative Transportation and Public Research Program, which provides a system by which DOT&PF research needs can be met.

Water Research Center: Solving water problems in Alaska is complicated by the sparse availability of data, poor quality of much of the existing data, the presence of unique phenomena (such as permafrost), low air and soil temperatures, a hydrologic cycle dominated by snow and ice, extensive wetlands, and the sheer vastness of this state. Water related problems abound in the realms of alternative energy, water quality and quantity, environmental quality related to normal development, as well as petroleum and resource extraction; wastewater treatment, fisheries, forestry, arctic engineering, and water law. The Water Research Center (WRC) conducts studies in hydrology, hydrogeology, hydraulics, limnology, climate change, fisheries, water chemistry, microbiology, isotopic geochemistry, oil spill, and applied technology. Specific capabilities include state-of-the-art analyses of major and minor inorganic constituents in water, sediments, minerals, wastes and living biological materials. Research tools include a variety of different computer systems with a wide range of peripherals and software, and major equipment such as mass spectrometry, flame and graphite furnace atomic absorption, and gas and liquid (ion exchange) chromatography. Field research is conducted throughout the state by WRC personnel.

The Water Research Center also takes a broader view, providing solutions to problems facing northern peoples outside as well as inside Alaska. Our development of time domain reflectometry for the in situ measurement of the unfrozen water content of soils and snowpacks, for example, has a profound potential for solving problems ranging from snowmelt flooding to designing roads and minimizing frost heave. Cooperative research with Canadian and European countries has provided partial solutions to a diverse array of problems. Some of this work, such as WRCs continuing program related to arsenic and heavy metal contamination, has immediate application to the northwestern United States, Canada, and Europe, as well as Alaska.

Environmental Technology Laboratory: The goals of the Environmental Technology Laboratory are to: conduct research relating to the management of the environment; facilitate technology transfer on environmental issues; act as a networking center for information and expertise within the University; provide a center of expertise in Alaska on environmental and resource management; facilitate access to and use of information and expertise by industry, business, and government; provide funding for research and graduate studies; and promote and enhance effective environmental education.

Alaska Space Grant Program is a cooperative effort with the Geophysical Institute. It supports a broad spectrum of activities to enhance the aerospace capabilities at UAF through grants for research, curriculum development, graduate student Princ

**Principal
Research Units
At UAF
(continued)**

fellowships, and aerospace scholarships. The majority of the funding is dedicated to graduate stipends and scholarships for students involved in ongoing aerospace research and projects. INE provides faculty, staff, and student support, as well as space in the Duckering Building.

Mineral Industry Research Laboratory

This laboratory was created by the Alaska State Legislature in 1963, with a mandate to conduct basic and applied research on problems of the mineral industries and to cooperate with the State and Federal government agencies. It conducts applied and basic research in areas such as coal preparation, coal science, mineral beneficiation, mine and mill design, new resource development, improved exploration and prospecting methods, and modern heap leaching technology.

Petroleum Development Laboratory

The primary function of this laboratory is to explore various aspects of enhanced oil recovery research, including the production of heavy oil through thermal recovery and miscible oil displacement. The goal is to transfer the information from the laboratory and field experiments to engineers who can apply it to problems in the oil fields.

University of Alaska Museum

The main research objectives of the Museum are to acquire and develop systematic research collections resulting from or forming the basis of object- or organism-based research on Alaska, the Arctic, and Subarctic, and to conduct collection-based research in the Cultural, Earth, and the Life Sciences.

Northern Center for Systematics and Biodiversity: This Center meets the need for primary specimen-based information. One primary function of this center is the development of electronic databases of the flora and fauna of the State of Alaska: the Northern Plant Documentation Center is an example.

The Alaska Quaternary Center: This Center, established in 1983, serves as the focus for interdisciplinary research in Quaternary Studies. This consortium of Quaternary scientists includes terrestrial and marine geology, paleolimnology, geography, climatology, tephrochronology, plant and animal ecology, palynology, vertebrate paleoecology, micropaleontology, ethnology, archaeology and human ecology.

Interdisciplinary Research Programs

Atmospheric Chemistry

Atmospheric Chemistry, administered by the Department of Chemistry, seeks to understand the complex changes in the atmosphere resulting from natural and human influences.

Biochemistry and Molecular Biology

This interdisciplinary program is administered by the Department of Chemistry. Its research deals with molecular approaches to biological phenomena, exemplified by studies of evolutionary relatedness of arctic animals by analysis of mitochondrial DNA, molecular mechanisms of gene control in soil bacteria, the structure and function of light harvesting proteins in marine algae, and the possible roles of metals in deposition of Alzheimer's-related proteins in the brain.

Environmental Sciences

Graduate research in Environmental Sciences may be pursued through several departments and may emphasize studies in Natural Resources Management, Environmental Quality Engineering or Science, Marine Biology, Wildlife Management and other areas.

Northern Studies

Studies of northern policy issues and the cultural, historical, economic and political contexts of the circumpolar north can be undertaken through departments of the College of Liberal Arts, including anthropology, economics, geography, history, political science and psychology.

Research Support

Electron Microscope Laboratory

Transmission and scanning electron microscopes, specimen preparation and photographic equipment are managed by a users committee and professional staff to support research in a variety of areas including arctic biology and human health.

Elmer E. Rasmuson Library/Media Center

The library has over 1.5 million bibliographic items in a variety of print and audiovisual media. It participates in the WLN bibliographic network, and other services, providing electronic access to over 12 million items nationwide.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

Research Support (continued)

The Bio-Sciences Library, housed in the Arctic Health Building, specializes in periodicals in the health and life sciences, especially as they relate to cold regions research.

The Alaska and Polar Regions Collections include the world-class Alaska Collection, the University Archives and Manuscripts collection, historical photographs, rare books and maps, and the oral history materials.

Microbeam Elemental Analysis Facility

UAF, through the Department of Geology and Geophysics, maintains a Cameca SX-50 electron microprobe, a state-of-the-art instrument capable of determining elemental abundances (all elements heavier than Be) in areas as small as 1 micron in diameter. The SX-50 has secondary, backscattered, and absorbed electron detectors for sample imaging. These, in combination with the rapid qualitative X-ray analysis offered by the SX-50's Kevex energy dispersive X-ray spectrometer, make the SX-50 a powerful tool for determining mineralogical and metallurgical phases. The system can map elemental distributions in small areas.

Office of Sponsored Programs

The Office of Sponsored Programs (OSP) supports the Vice Chancellor for Research and Dean of the Graduate School by performing a threefold mission. Primarily, it helps coordinate research initiative and activities, and assists faculty and professionals in meeting their funding goals for research, scholarly activities, education, and service. Secondly, OSP assists with the preparation and submittal of funding proposals, and seeks to ensure that proposals meet University, State, Federal and funding agency requirements. Finally, OSP provides reports and analyses to the University administration on trends and projections of proposals and funding activities that are important for accountability and planning purposes.

Polar Ice Coring Office

UAF hosts this international, National Science Foundation-funded program to extract polar ice cores more than 3,000 meters deep for a variety of research studies conducted by UAF and other NSF grantees. The program draws upon, and enlarges, UAF's arctic experience, especially in engineering, and polar research. Ice sheets contain prehistoric records of annual precipitation, atmospheric temperature and composition, solar activity and volcanic eruptions; ice core samples therefore provide a detailed, historical database of climatological data since the last interglacial period which will be of inestimable value as we analyze apparent global warming trends. PICO provides a wide variety of logistical and technical support in other aspects of NSF-sponsored research in remote glaciated regions of the world.

Research Support (continued)

University of Alaska Press

The Press publishes scholarly nonfiction works in all disciplines concerning Alaska, the North Pacific Rim, and the circumpolar region. Presently, the Press issues 6 to 10 new titles a year; it also assists in distributing publications and videos produced by other small publishers and university departments.

Cooperative Extension Service

Cooperative Extension Service (CES) represents a unique entity within the University of Alaska system. It is part of a nationwide informal education system which functions in a cooperative relationship between the federal government through the United States Department of Agriculture and the various states through land-grant colleges and universities. The legal status of CES is provided through the federal Smith-Lever Act, Alaska State statutes, and Memorandum of Agreement between USDA and the University of Alaska.

The mission of CES is to interpret and extend relevant, research based knowledge in an understandable and usable form, and to encourage the application of this knowledge to solve problems and challenges that face the people of Alaska. Extension education in Alaska is delivered by faculty located in communities in 11 off-campus sites. Major program areas includes: Home Economics, 4-H Youth Development, Agriculture & Nature Resources, and Community Development and are briefly described as follows:

Agriculture and Nature Resources focuses on educational programs covering production agriculture, livestock, agronomy and commercial horticulture, forestry, and natural resource management.

Community Resource Development is an extension education program intended to assist communities in the facilitation of local organizational process and community decision making in areas of: energy education, public policy, community economic development, local government and leadership education.

Home Economics is an educational program designed to address the quality of family life and the home environment. Program areas include: food safety and quality; family stability; nutrition, diet and health, including EFNEP; parenting and child development; housing and energy; resource management, clothing; and senior programs.

4-H Youth Development is an educational program of the University of Alaska and Land Grant System in cooperation with USDA. Youth and adults learn vocational and life skills, develop leadership and self esteem, and engage in community service.

Section 2

HIGHLIGHTS

Introduction

Section 2 contains academic and assessment information. Table 2.1 lists all degree and certificate programs offered at UAF by campus along with program attribute information, such as the minimum number of credits required for the degree. Tables 2.2 and 2.3 present two different measures of instructional workload; class size and sections taught data as well as student/faculty ratios. Tables 2.4 and 2.5 begin to provide assessment information concerning entrance test scores and grades earned at UAF. Lastly, Tables 2.7 through 2.9 summarize current domicile data on UAF alumni.

Changes from Fact Book '91

Five new tables have been added to this year's Fact Book. Table 2.2 on class size provides information by college, course type, and level. Tables 2.7 to 2.9 show the distribution of UAF alumni by country, state, or Alaskan community. Table 2.4 has been expanded to include freshmen SAT test scores. Additional changes have been made to Tables 2.5 and 2.6. Table 2.5 includes two-year trend data with the percentage change to the mean average course GPA column. Table 2.6 has been expanded to include a nine year trend of degrees awarded. Future year Fact Books will provide more assessment and outcomes information including results of the recently started survey on bachelor degree completers.

Highlights

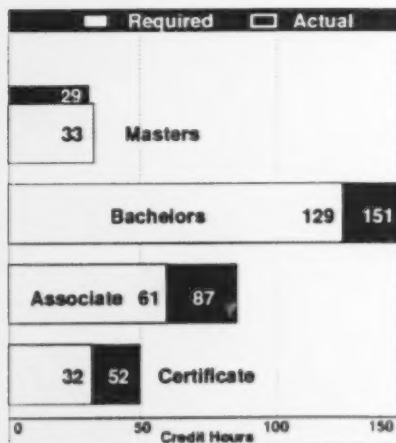

- UAF added one new associate degree, the Renewable Resources AAS, in FY92.
 - For the third straight year, the overall UAF student faculty ratio declined. In FY92, the SFR was 13.7 (-1%). The greatest decline was for lower division undergraduate courses, which dropped 4%. Both graduate (+4%) and development education course (+2%) SFRs increased from last year's ratio.
 - The average Fall 1991 lower division lecture class size was 18 students, for upper division it was 16, and for graduate it was 10.
 - In FY91, UAF graduated 488 bachelor's students; the most in its history.
 - 27% of in-state UAF alumni live in the Anchorage-Palmer-Kenai area.
-

- NOTES: (1) Student FTE is a hypothetical student who enrolls in 15 undergraduate or 12 graduate credit hours per semester. The student FTEs in this table are course-based, not student-level based, indicators of productivity.
- (2) Faculty FTE is, for non-thesis/research/practicum/individual study/intern courses, equal to the number of fall semester undergraduate course credit hours taught divided by 12 and the number of graduate credit hours divided by 9. For thesis/research/practicum/individual study/intern undergraduate courses and courses with less than three students, equals student credit hours divided by (5 x 12); for similar type graduate courses, equals student credit hours divided by (3 x 9). No Faculty was equated to more than 1.00 faculty FTE.
- (3) Student Faculty Ratio is the student FTEs divided by the faculty FTEs.
- (4) Professional/Post Bachelors are combined with Graduates for 1987 - 1990.

NOTES: (1) Beginning Fall 1989, UAF began accepting either ACT or SAT scores.

(2) Beginning Fall 1990, the Enhanced ACT replaced the ACT.

(3) Both ACT and SAT scores are reported for students who took both tests.

NOTES: (1) A program with an "X" indicates the program has been or is scheduled to be deleted; an "S" indicates a temporary suspension of the program.

(2) A dash in the AWARDS field indicates the program was not offered that year.

(3) Currently offered programs are shaded if a) they are 10+ years old, b) since FY87, Masters and below have yielded less than 5 awards, doctoral less than 2 awards.

(4) AVG SCH cells are shaded if SCH is: a) +50 for Certificate or Masters, b) +75 for Associates, or c) +155 for bachelors (UAF SCH only, excludes transfer SCH).

Section 3

HIGHLIGHTS

Introduction

Section 3 contains information on UAF students. Information concerning applications, admissions, and new/returning students is summarized in Tables 3.1 and 3.2. Table 3.3 through 3.5 show where UAF students came from by nation, state, or Alaskan community. Student attribute information is contained in Tables 3.6 through 3.9. Lastly, credit hour and FTE trend data are provided in Table 3.10 through 3.13.

Changes from Fact Book '91

Beginning in Fall 1991, year-long Independent Learning students are included in all headcount and credit hour statistics. Two new tables, Table 3.5 and 3.12, have been added. Additionally, demographic statistics reported in six tables last year have been incorporated into two tables this year.

Highlights

- Student headcount increased 7% over the previous Fall. There was a 32% increase in international students, a 26% increase in students from other states, and a 5% increase in Alaskan students.
 - Associate degree students increased by 30% in Fall 1991. There was a 13% increase in masters degree students, and a 10% increase in non-degree seeking students.
 - Associate of Arts students in the School of Career and Continuing Education more than doubled, jumping from 179 to 380 students. There was also a substantial increase in associate degree students in the College of Rural Alaska, going from 125 last Fall to 178 this Fall.
 - Every college had an increase in bachelor's degree students except the College of Rural Alaska, whose greatest decrease was in education students.
 - The Masters' of Arts program in Northern Studies, begun in FY91, started strongly with 34 students.
 - UAF continues to have modest growth with both student headcount (+7%) and credit hours (+1%).

NOTES: (1) A program with an "X" indicates the program has been or is scheduled to be deleted; an "S" indicates a temporary suspension of the program.

(2) A dash in the headcount field indicates the program was not offered that year.

(3) An "na" indicates data concerning this program were not applicable.

NOTES: (1) For UAF Total, percents in the column label "%FTE of College Total" are course level FTEs divided by total UAF FTEs.

(2) A department is shaded if it has a five-year trend of declining FTE production (a negative slope).

(3) In the column, "Dept FTEs earned by the Dept's Majors", a cell is shaded if its percentage lies outside the range 25% to 70%.

(4) Changes from last year's Fact Book for Fall 87-90 SCH and FTEs are due to the inclusion of Independent Learning credit hours.

Source: UAF Fall 1987-91 End-of-Semester SIS Extracts

NOTES: (1) Students enroll in Independent Learning courses at any time and have up to one year to complete them.

FY91 enrollees then, are not necessarily the same students as the FY91 completers tabulated above.

(2) Course subject was not offered in FY91.

(3) Presently, only semester-based Correspondence Study headcount and credits hours are included in Table 3.7.

Section 4

HIGHLIGHTS

Introduction

Section 4 contains faculty and staff information as well as selected comparative salary statistics. Table 4.1 contains data on full- and part-time employees by gender, ethnicity, and job category for UAF departments and administrative divisions. Tables 4.2 through 4.5 contain UAF-specific data on full-time faculty concerning tenure status, salary, demographics, highest degree earned, years in rank, and faculty appointments by academic department. Table 4.6 shows how UAF faculty salaries compare with average faculty salaries paid by other land-grant universities for faculty within a particular discipline and rank cohort.

Changes from Fact Book '91

Table 4.1 has added breakdowns on the percentages of resident females and minorities. In addition, Tables 4.2 and 4.4 have been expanded to include information on mean salary by department. Charts in Table 4.4 have been enhanced to include information by rank. Two new tables have been added to this year's Fact Book. Tables 4.5 adds faculty information on service years by age, sex, and department. Table 4.6 adds land-grant university faculty salary comparative data.

Highlights

- Full-time employees increased to 1,649 (+1%). Almost all of the increase was in faculty employment, which increased by 6% over last year.
 - Part-time employees increased to 1,696 (+17%). The two areas with the largest increases were technical employees which increased to 102 (+132%), and clerical which increased to 188 (+32%).
 - 56% of tenure track faculty were tenured in FY92. Tenure rates for Alaskan Natives were 25% below the UAF average. Tenure rates for women were 15% below average.
 - In FY92, UAF had 15 tenured minority faculty (7%).
 - Average FY92 salaries were lower for females in all full-time employee categories except the technical and maintenance areas.
 - 24% of UAF full-time faculty earned less than the average salary paid by other land-grant universities in FY92.
-

NOTES: (1) The column labeled "% Minority", is the ratio of the number of resident non-white employees divided by the number of resident employees.

An employee EEO category with 20 or more employees is shaded if its minority percentage lies outside the range 10% to 40%.

(2) In the column labeled "% Female", a cell is shaded if the total number of employees is 20 or more and the percent that are female is less than or equal to 20%, or greater than or equal to 80%.

(3) In the column labeled "% '90 Diff", a cell is shaded if there are 20 or more employees and there is a +/-20% or greater FY90-91 change.

(4) Some department designations / breakdowns for employees (in SCCE, SOE, CRA, SME, and some institutes) do not match the actual organizational structure. Academic information has been poorly maintained on the HRS system and also does not reflect current

UAF policies regarding faculty. This situation necessitated extensive manual data manipulation prior to the creation of the tables in this section.

Section 5

HIGHLIGHTS

Introduction

Section 5 contains budget and financial information for the University as well as selected comparative statistics. Tables 5.1 through 5.4 include data on general UAF revenues and expenditures. Tables 5.5 through 5.7 contain UAF-specific data on state student financial aid, graduate support, and tuition rates. Tables 5.8 through 5.11 include comparisons between Alaska and other states.

Changes from Fact Book '91

Two new tables, 5.1 and 5.6, have been added since last year's Fact Book; one on the UA State Budget Appropriation History and one on Graduate Assistantship Support. Additional graphs have been incorporated into Table 5.5 showing the distribution of Alaska State Student Loans to students by their school state.

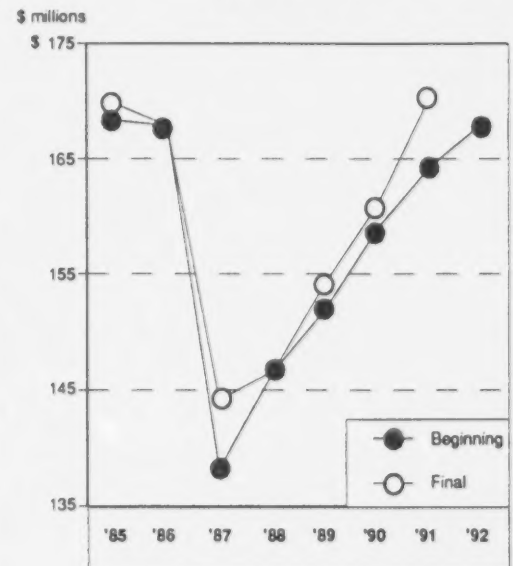

Highlights

- UAF unrestricted Education & General revenue increased by \$5.8 million (+6%) in FY91. This can be attributed to and increase of \$0.9 million (+12%) in student fees, \$3.6 in state support (+4%), and \$9 million (+14%) in indirect cost recovery. An increase of \$2.3 million (+5%) was realized in restricted fund revenues.
- Unrestricted expenditures increased by \$5.3 million (+5%). Instructional expenditures increased by the greatest dollar amount; \$2.0 million (+6%). Organized research followed, with an increase of \$1.3 million (+6%).
- Resident undergraduate tuition and fee charges at UAF are 7% greater than the average charges at comparable public universities in the Western U.S.
- 61% of the undergraduate students receiving State Student Loans were enrolled in-state while 25% of graduate students were enrolled in-state.
- Nationwide, there has been a downward turn in state support. The number of states reporting an increase in two-year percentage gains has decreased from 31 states in 1990, to 17 states in 1991, to 9 states in 1992. Similarly, there have been rapid increases in the number of states reporting two-year percentage decreases since 1990, when 15 states reported decreases. Since then, that number has doubled with 26 states reporting decreases in 1991 and 40 states in 1992.

FY85-92 State Appropriations Beginning vs Final

FY85-92 State Appropriations Final Authorization as a Percentage Above or Below Original Budget Request

NOTES Restructuring of rural campuses occurred in FY87.

(1) University Request includes adjusted base plus increments.

(2) FY88 Increments included a reduction of \$15.0 million as a result of restructuring.

NOTES: Other tables vary from this one in the following ways:

- (1) Section 3 tables do not distribute all interdisciplinary to colleges and do not include full-time extended registration students as full-time.
- (2) Section 4 tables do not include research and teaching assistants working in other than the selected October pay period.
- (3) Instances where this column total exceeds 100% are due to departments paying for students outside their departments.

NOTES: Consolidated Tuition rate was changed from 12 to 13 credit hours for FY90.

Students enrolled in only one credit hour are charged in-state rates regardless of residency status.

In FY92 students enrolled in lower division classes were charged \$43 and \$150/cr. hr. for resident and non-resident tuition respectively.

#1 RESIDENT STUDENT SOURCE. High school graduates per 1,000 population (B/A). This is the primary source of entering freshmen at public institutions in the state and is therefore the best single starting base for deriving total enrollments. The state's primary higher education responsibility is to provide post-secondary educational opportunities to its own resident high school graduates.

#2 PARTICIPATION RATIO. Annual full-time equivalent enrollment in public institutions of higher education per high school graduate (C/B). This ratio measures the degree to which a state provides attractive and accessible opportunities for higher education to both in-state and out-of-state students relative to the size of its resident student source. High ratios indicate states heavily in the "business" of higher education compared to their basic responsibility to high school graduates.

#3 TAX CAPACITY. The potential of state and local governments to raise revenues for public purposes through various kinds of taxes (D/A). Measured by a "representative tax system" that defines the tax capacity of a state and its local governments as the amount of revenue they could raise if all 50 state-local systems applied identical tax rates (national averages) to their respective tax bases. Adjustment by the COG index establishes equivalent state purchasing power by correcting for geographical price differences.

#4 TAX EFFORT. State and local tax revenues collected as a percentage of state and local tax capacity (E/D). Tax effort measures, as a percentage, how much of the state and local government tax capacity is actually used. The tax revenues collected for all states equals total tax capacity nationwide, so that the national effort, by definition, is 100 percent. Effort measures for the individual states indicate how they compare with the national average.

#5 ALLOCATION TO PUBLIC HIGHER EDUCATION. State and local tax revenue appropriated or levied for current operating educational expenses of public institutions. This ratio suggests the relative importance and requirements of financing public student education to the funding of other public services in the state and local government budgets. The ratio for total appropriations is shown in ().

#6 TUITION FACTOR. Student tuition revenue as a percent of total revenues from state and local government education appropriations plus student tuition revenue. This ratio suggests the relative importance of student tuition as a funding source compared to state-local appropriations. High ratios may reflect a large proportion of out-of-state students paying high non-resident tuition.

POTENTIAL TAX REVENUE PER STUDENT. These combined input factors establish a state's basic tax potential to finance public institutions relative to student enrollment load. Relatively stable tax potential to finance individual student's education without taking into account the types of institutions attended. Tax potential related to the state system's financial support requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power.

EDUCATION APPROPRIATIONS PER STUDENT. State and local tax revenues appropriated for current operating education expenses of public institutions per annual FTE student. Indicates average state support to individual students without taking into account the types of institutions attended. Education approp's related to the state system's funding requirements are reported as an index (APP/SSI). Appropriations for research, agriculture, and medical are reported as a percent of total appropriations to suggest relative importance, and per capita as a need measure shown in ().

COLLECTIVE FINANCIAL ACTIONS. The combined actions are the factors that establish the degree to which the potential tax revenues per student are actually utilized to achieve the support level provided. States with high percentage are making a substantial combined tax effort, allocation to education, and tuition charge to finance public institutions.

NET TUITION REVENUES PER STUDENT. Tuition revenues of public institutions per annual FTE student. Indicates average tuition (less state appropriated student aid) paid by all resident and non-resident students without recognizing the types of institutions attended. Tuition related to the state system's funding requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power. Tuition revenues per student relative to disposable personal income per capita indicates tuition level relative to resident ability to pay.

Section 6

HIGHLIGHTS

Introduction

Section 6 focuses on UAF's research and public service functions. Tables 6.1 through 6.3 list research funding, proposal activity, and other measures of activity within each research institute. Tables 6.4 through 6.7 provide comparative information on UAF libraries and academic computing facilities. Lastly, Tables 6.8 to 6.10 highlight the following public service outreach functions at UAF: the Cooperative Extension Service, Museum, and KUAC broadcasting.

Changes from Fact Book '91

Expanded from last year's Fact Book, Table 6.5 on libraries now includes a comparison of UAF's library with similar NSF ranked research and development institutes. Table 6.6 on GNOSIS now includes two-year trend data with percentage changes calculated for total holdings and patrons. A new table, Table 6.10, was added on KUAC public radio and television funding. Future year Fact Books will delimit improved measures of research and public service activity.

Highlights

- UAF was rated 86th out of the nation's top 100 research and development universities. Additionally, the State's return on its General Fund research investment reached a record level 230% in FY91.
- Faculty submitted 25% more research proposals in FY91 than in the previous year, for a total of \$106 million in outside funding.
- Utilization of the GNOSIS computerized library system continued to increase. The number of patrons jumped by 25% in FY92 and the number holdings included in the system increased by 16%. Sites in Kodiak, Mat-Su, and the Geophysical Institute came on-line in 1991 with the FITC facility in Kodiak scheduled for linking in 1992.
- KUAC donor contributions increased by 37% in FY91. The average donor contribution increased to nearly \$100, up by nearly 60% from the previous year.
- Museum visitations topped 130,000 in FY91, a 31% increase from FY90.

NOTE: Dollars in thousands. Figures cover only research-and-development expenditures in science and engineering.

Due to the differences between how the University and NSF reports these data, the numbers here will not match those in Table 5.3.

"n/a" denotes the institution was not in top 100.

FY91 Contact Hour Distribution by Activity

Notes: Programs in Ketchikan were not active during FY91 due to sabbatical.
 (1) The number of people times the hours spent with those people (3 persons for 2 hours = 3 X 2 = 6 contact hours).
 (2) One hour to several days intensive group learning session on a specific topic.
 (3) Staff whose work is carried out under the supervision of a professional, either an agent or a specialist.

Table 7.5 FY89-91 Leased Space by Unit	7-13

Section 7

HIGHLIGHTS

Introduction

Section 7 contains descriptive statistics on UAF's buildings and includes several indicators of how well space is being utilized. Table 7.1 and 7.2 provide age, gross footage, investment values, and room use by building. Table 7.3 contains data on housing capacity and occupancy rates. Table 7.4 shows weekly classroom utilization by time of day. Lastly, Table 7.5 provides a three-year trend on the cost of leased space, how much is being leased, and where it is.

Changes from Fact Book '91

This year, charts depicting the age of UAF's buildings have been added in Table 7.1. Table 7.2 has been expanded to include structural building footage which delineates the portion of each building that is not usable. In the last change, Table 7.3 has been expanded to include wait list data for UAF housing to more clearly define residential housing demand. Future year Fact Books will include more information regarding instruction space utilization and attributes concerning UAF equipment, such as what equipment has been purchased, when, by what unit, for what purpose, and at what cost.

Highlights

- Seven out of every ten UA System buildings are part of the UAF physical plant. 87% of building gross square feet is contained in buildings located at the Main Campus in Fairbanks.
- UAF's current investment value of its buildings is \$5.24 billion. This is a 5% increase over FY91's investment value.
- Half of UAF's buildings, which account for 65% of the total UAF gross square feet, are over 20 years old. 20% are over 30 years old. With an average building age of 24.8 years, UAF has the oldest plant of any of UA's institutions by a considerable degree.
- There was a net loss of over 100,000 gross square feet from FY91-92. This was primarily due to the sale of the Yak Estates married student housing complex.
- Space designated for Instruction/Research Labs has increased by 3%, or 66,000 square feet in FY92.
- While the amount of leased space remained constant from FY91-92, rates increased 4%.

NOTES: (1) Year Acquired - the year the structure was first physically occupied.
(2) GSF - Gross Square Feet.
(3) Current Plant Investment - the estimated funds required to recreate the entire facility in its current configuration in current dollars.
(4) Excluded from this report are leased facilities and certain remote research facilities, such as those at Toolik Lake, which are sited on non-University owned land and which operate by virtue of annual renewals of use permits granted by the State.

Glossary

Academic Unit	Campus or center designation used by Admissions & Records for SIS processing.
Accepted	Person whose enrollment application credentials have been processed and approved by Director of Admissions.
Administrative Staff	Full-time employees whose assignments require primary and major responsibility for management of the institution, or a customarily recognized department or subdivision thereof. Included are the Chancellor, Vice Chancellors, Deans, Institute Directors, and other officers of academic departments whose principal activity is administrative in nature. Supervisory personnel of the technical, clerical, skilled craft, and maintenance forces are reported within those specific categories.
Admitted	Student accepted for enrollment at the University.
Applied	Person who completed a UAF enrollment application form and is awaiting acceptance.
Associate Degree	Undergraduate degree. Minimum of 60 credits required.
Bachelor Degree	Undergraduate degree. Minimum of 120 credits required.
Base Year	The year used for the comparison of subsequent years' information.
Certificate	Undergraduate program that can usually be completed in one year. Minimum of 30 credits is required (exception CHPs).
Class Standing	The division of students by the number of credits earned. (Freshman, Sophomore, Junior, Senior, Graduate).
Closing Enrollment	Enrollment at the end of a semester after grades are posted.
Continuing	Students enrolled a previous semester as well as the current semester.
Credit Hours	Unit of measure toward attainment of degree. Approx: 1 credit = 1 hr lecture time/week for 1 semester.
Credits Carried	The number of credit hours for which a student is enrolled.
Daytime/Evening	Any class that begins after 7:30 a.m. and before 5:00 p.m. is a daytime class. Any class that begins at or after 5:00 p.m. is an evening class.
Degree	Award for completion of a program. Degrees available: Certificate, Associate, Bachelor, Ed.S., Master's, Ph.D.
Designated Funds	Current funds (funds expendable for day-to-day operations) not under state control and identified for a specific purpose.

Glossary (continued)

Developmental	50-99 level courses. Preparatory courses that are not applied to major.
Direct Private Gift	Gifts made directly to the university by external entities.
Distribution	The spread in percent of degrees, enrollment, or credit hours through the university, or college.
Doctorate Degree	Ph.D, terminal graduate degree. Approximately 3 full years beyond bachelor degree.
Educ. Specialist Degree	Graduate degree. Minimum of 36 credits beyond a master's degree.
Enrolled Credit Hours	Calculated. Number of credit hours multiplied by the number of enrolled students.
Enrollment	Number of students taking at least one course.
Ethnicity	Racial group with which student identifies (self-reported). International students are grouped together.
1st-time Freshman	Student not previously enrolled at any college.
Fiscal/Academic Year FTE:	Undergraduate credit hours/30; Graduate credit hours/24.
Fiscal Year	A twelve-month period of time starting each July 1 including the summer, fall, and spring semesters.
Freshman	Class standing of a student with 0-29 credits.
Full Time Equivalent (FTE)	Calculated figure. Semester FTE: Undergraduate credit hours/15; Graduate credit hours/12.
Full-time Student	Undergraduate enrolled for 12 or more credit hours. Graduate enrolled for 9 or more credit hours.
FY90 Annualized Tuition, Fees	Annualized tuition is the total two-semester tuition charged for a student taking a courseload at the consolidated level or above. Annualized fees are the total two-semester fee charges a student taking a courseload at the consolidation level normally must pay.
Graduate	Student admitted to a master's or doctoral program. Credit Hours at the 600 level.
Headcount	An individual enrolled.
Hometown (Application City)	Community where student was receiving mail at the time of application.

Glossary (continued)

Indices	Ratio of current year to base year measurement.
INSITE	Software package used to inventory and track UAF facilities.
Instruction/Research Labs	Instruction and/or research laboratories.
Interdisciplinary	Individualized degree program significantly different from those already approved by the Board of Regents.
International	Non-U.S. citizens who are not permanent residents.
Junior	Class standing of student with 60-94 credits.
Leased Space	Space not owned by UAF for which formal lease agreements have been arranged.
Level	Used to identify reports with undergraduate (lower, upper) and graduate credit hours or enrollment cohorts.
Lower Division	100-200 level courses.
Main Campus	Fairbanks including the Downtown Center.
Maintenance Staff	Employees whose duties result in or contribute to the comfort, convenience, and hygiene of personnel and the student body, or which contribute to the upkeep and care of buildings, facilities, or grounds of the institution property.
Major	The degree program a student declares to be striving to complete.
Master's Degree	Graduate degree with minimum of 30 credits beyond the bachelor degree.
Migration	Tracking of students from previous semester to show current class standing.
Minority	People whose ethnicity is Alaska Native, American Indian, Asian, Black, and Hispanic. Students not included are Whites, Unknown, Other, and International.
New Student	A student who has not previously been enrolled at UAF.
Non-degree seeking	A student not enrolled in any degree or certificate program or a student with an undecided major. Also referred to as "special students".
Non-Tenure Track	Faculty not eligible for tenure; includes some instructors and visiting appointments.

Glossary (continued)

Opening Enrollment	Enrollment at the beginning of the semester. Usually taken at the end of the course add/drop period (3rd week).
Origin	State or community where the student was receiving mail at the time of application; citizenship is used as origin for international students.
Other	Students who cannot be categorized in another group.
Paraprofessional (CES)	Staff whose work is carried out under the supervision of a professional, either an agent or a specialist, and whose work is related to a specific program area. These include Pest Scouts, other Land Resources program efforts in connection with their specific area of expertise, and assistance agents in program delivery.
Part-time Faculty /Staff	All employees whose coding on the UACN HRS System indicates that they are part-time employees regardless of funding sources.
Part-time Students	Undergraduate students enrolled for less than 12 credit hours. Graduate students enrolled for less than 9 credit hours.
Professional Staff	Employees whose assignments require either college graduation or experience of such kind and amount as to provide a comparable background. These employees are not included in the Administrative, Faculty, Clerical, Technical, Skilled Crafts, or Maintenance categories.
Professional/ Post Bach Courses	500 level courses.
Program	A field study classified by CIP code, the major, and degree type.
Research Faculty	Employees whose primary assignments customarily are made for the purpose of conducting research as a principal activity; instruction and public service may be performed as additional activities.
Research Labs	Laboratory space not primarily used for classes.
Resident Student	Students defined as residents for the purposes of tuition charges.
Restricted Current Funds	Funds accepted by the university on the condition that they be used for donor-specified current operations. Upon accepting restricted funds, the university is legally bound to use the funds for the specified purpose or to refund them.
Returning Student	Previously enrolled student that returns after an absence.

Glossary (continued)

Rural Campus	Bristol Bay (Dillingham), Chukchi (Kotzebue), Kuskokwim (Bethel), Northwest (Nome), Interior, and Arctic Sivuunmun Ilisagvik College (Barrow).
Senior	Class standing of an undergraduate student with 90 or more credit hours.
Skilled Crafts Staff	Employees whose assignments typically require special manual skills and a thorough and comprehensive knowledge of the processes involved in the work, acquired through on-the-job training and experience or through apprenticeship or other formal training programs.
Sophomore	Class standing of an undergraduate student with 30-59 credit hours.
State Financial Aid	Grants and loans made to Alaskans attending approved schools, both inside and outside of Alaska.
Student Credit Hour	A unit of measure that represents one student engaged in an activity for which one hour of credit for a degree or other certificate is granted upon successful completion.
Student Information System	Database on which student information is maintained (SIS).
Technical Staff	Employees whose assignments require specialized knowledge or skill which may be acquired through experience or academic work that is offered in many two-year technical institutes, junior colleges, or through equivalent on-the-job training.
Tenure	Full-time faculty (regardless of funding source) whose coding on the HRS database indicates they have tenure.
Transfer Student	Student enrolling with credit from a previous college.
Trend	The change in a measurement with respect to time.
Undecided	Student that has not decided on a major.
Undergraduate	Courses at the 100-499 level. Students who are not enrolled in a graduate program.
Unknown	Person did not provide information to determine category.
Upper Division	300-400 level courses.

Abbreviations

ACPE	Alaska Commission on Postsecondary Education
ACT	American College Test. Four sections (Math, English, Social Sciences, Natural Sciences).
CIP	Classification of Instructional Programs (U.S. DOE)
CLA	College of Liberal Arts
CNS	College of Natural Sciences
CPU	Central Processing Unit
CRA	College of Rural Alaska
EACT	Enhanced American College Test replaced ACT (English, Math, Reading, Science). The composite is the average.
FT	Full-Time Students
FTE	Full-Time Equivalent (student of faculty)
HRS	Human Resource System
INE	Institute of Northern Engineering
INSITE	Institutional Space Inventory Techniques
SALRM	School of Agriculture & Land Resources Management
SAT	Student Achievement Test
SCCE	School of Career & Continuing Education
SCH	Student Credit Hours
SFR	Student Faculty Ratio
SOE	School of Engineering
SFOS	School of Fisheries & Ocean Sciences
SIS	Student Information System
SOM	School of Management
SME	School of Mineral Engineering
UAF	University of Alaska Fairbanks
WICHE	Western Interstate for Commission of Higher Education
